

CISCO ACADEMY TRAINING CENTER

The Pacific Center for Advanced Technology Training (PCATT) and Honolulu Community College (HCC) are one of only three locations in the world designated as a Cisco Academy Training Center (CATC) for both the Cisco Certified Network Associate (CCNA) and Cisco Certified Network Professional (CCNP) curricula. Cisco levels I through IV prepare you for the CCNA certification, while levels V through VIII prepare you for the CCNP certification. All courses use official Cisco curriculum materials and adhere to Cisco's quality standards. The PCATT/HCC CATC has trained individuals from Canada, Australia, New Zealand, China, Mexico, Singapore, and the mainland United States.

Course Offerings

The courses offered by the PCATT/HCC CATC include the basic theoretical foundation in internetworking required to implement networking solutions in the real world. Training classes are offered for businesses and educational institutions. The majority of class time is spent participating in labs designed to help you learn to use the networking equipment and tools. These courses are quite popular because of this emphasis on hands-on training. If you are interested in taking a course, sign up today. Seats are limited and are assigned on a first-come, first-served basis.

- Cisco Networking I: Internetworking Fundamentals
- Cisco Networking II: Basic Router Configuration
- Cisco Networking III: Intermediate I Router Configuration
- Cisco Networking IV: Intermediate II Router Configuration
- Cisco V: Building Scalable Cisco Networks (BSCN)
- Cisco V-A: OSPF
- Cisco V-B: EIGRP, Route Optimization, Traffic Management, and BGP
- Cisco VI - Remote Access
- Cisco VII – Multilayer Switching
- Cisco VIII – Internetwork Troubleshooting
